RLY

Request to Exit Station (No Touch)

Main Features of the product:

- Proximity Sensor for "No Touch" Operation.

- 10-15 mm sensing distance.

- LED indication for relay active/inactive status.

- Potential Free NO relay output.
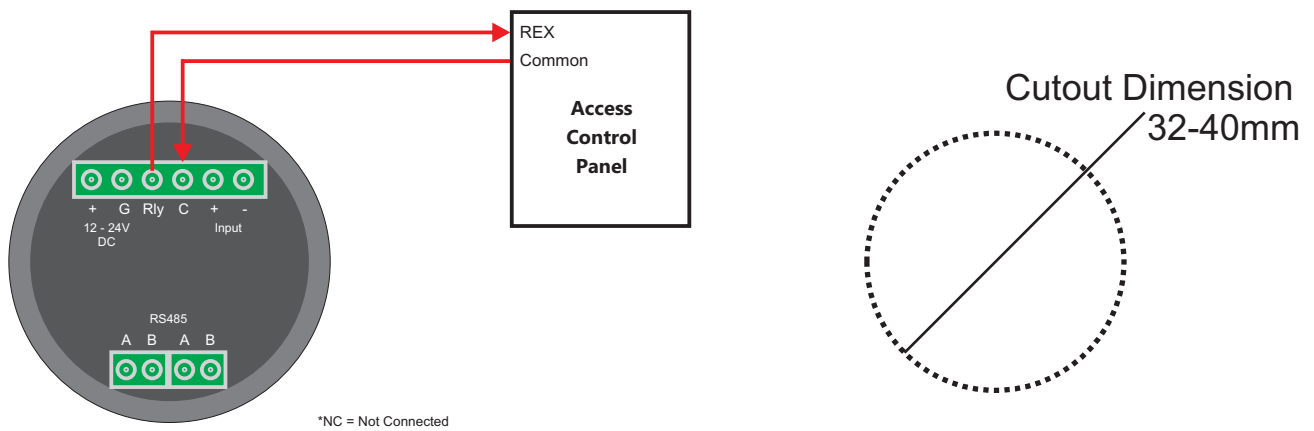

- Digital Input.

- ABS enclosure.

Contactless Request to Exit Button is safe, clean and undeniably the best way to release door. To operate the switch, Place your finger in proximity to the button surface. A LED Indication will indicate that the relay has been activated. Relay will activate and Exit request signal is transmitted to the connected Access Control Panel.

Areas of Application

- Offices
- Industries
- Conference rooms
